Objective

My career objective is to find a company where I can contribute to technology that will improve people's lives while growing as a data analyst and software developer.

Coding Projects

- **"Noats"** - Used MySQL, Javascript, and Node.js to create personalized recipe database app. Deployed via Heroku at <https://thawing-shore-71367.herokuapp.com/>
- **"Budget Tracker"** - Used MongoDB, HTML, Javascript and Node.js to create a progressive web app for tracking personal finances. Deployed via Heroku at <https://secret-chamber-71580.herokuapp.com/>
- **"Uplift"** - Created API routes in Javascript to randomize content from several different providers for a wellness-themed entertainment app. Deployed via Github at <https://vega2020.github.io/project1vibe/>
- **"Ace"** - Used MongoDB and React to create a flashcard-based interview prep app for Boot Camp graduates. Deployed via Heroku at <https://arcane-beach-70075.herokuapp.com/>
